16. (Amended) The cover panel as set forth in claim 15, wherein:

a3 said seal includes at least one finger extending into said U-shaped groove, said at least one finger configured to frictionally engage said horizontal flange of said cover member.

21. (Amended) The cover panel as set forth in claim 20, wherein:

a4 said spring clips include a connecting flange that extends above an upper edge of said cover member, wherein a tool can be inserted in a space located between said upper edge of said cover member and an outwardly protruding member of the frame located above said cover member so as to engage said connecting flange of said spring clip and depress said connecting flange so as to disengage said tab of said attachment members from the inside surface of the cross-member to disengage said spring clip from its associated window.

Please add the following new claims.

37. (New) The partition as set forth in claim 1, wherein:

said attachment members are removable from said cover member.

38. (New) The partition as set forth in claim 1, wherein:

a5 said cover member is removable from said frame.

39. (New) The partition as set forth in claim 1, wherein:

said cover member includes a vertical flange; and  
said attachment members are connected to said vertical flange.

40. (New) The cover panel as set forth in claim 14, wherein:

said attachment members are removable from said cover member.
